INTRODUCTION

Radio Frequency IDentification (RFID) is fast becoming one of the hottest, yet most controversial technologies in logistics and supply chain management (SCM) in recent years. The current development of RFID is not restricted to experimental researches, but also applied in our daily life.

By visiting one of the biggest RFID exhibition centres in Hong Kong, participants, especially academic researchers can gain more updated information regarding to their studies. With the sharing session after the visit, attendants, no matter in what extent are able to further both the interest and horizon in high technology application in supply chain industry as well as to prepare well for their future career.

BENEFITS

- To enhance awareness of the application of RFID technology in dairy life
- To update the current development of supply chain industry
- To exchange ideas among technicians, industry professionals and project researchers
- To view the actual infrastructure and environment of RFID

WHO SHOULD ATTEND

- Undergraduates / postgraduates interested in RFID topic
- Researchers in related topics
- Professionals in supply chain related field
- Staff interested in supply chain management and security industry
